CATALOG MOTOR YACHTS

## Introduction:

This catalog is an indication of possible models of motor yachts. There are hundreds of makes and sizes but only 2 very different types. Monohull and multihull yachts, both have a been included in this catalog. This selection has been made to give you an idea of what exists and is possible. Once you have chosen a certain type of model and size we can also, on demand, look into other makes and their nearby sizes.
